Locality

Tuzla lake and its extensive wetlands, lie at the end of a deep inlet from the Gulf of Gulluk and Mandalya Bay. The area is unique as it is where the Lake links with the sea. Embraced by rolling mountains covered with a rich combination of wild shrubs, olive groves, pine and Tamarisk trees, this is perhaps one of the most beautiful locations in Turkey.

Ancient remains can be seen emerging from the still calm of the lake. Tuzla Lake has been a nature reserve under international protection since 1994. A huge variety of birds take sanctuary here in the rich wetlands. Flamingos flock to the area by the thousands (October - May) and you can also see the largest population of White Storks in the region. Pelicans are also frequent visitors. Among other species you can spot the Heron, Mallard, Water Chicken, Grey and Hungarian Duck and Swallow. Butterflies also breed here and the Two-tailed Pacha is an unforgettable find for nature lovers and bird watchers alike.

The village of Boğazici which lies on the mouth of the estuary is an idyllic testament to Turkish tradition with its quaintly sparse settlements and taverna-style fish restaurants. Tuzla is an enchanting paradise!
